

CLIENT

Charters Towers Regional Council

LOCATION

Greenvale Qld

CONTRACT VALUE

\$151,000

PROJECT DURATION

September 2015 – October 2015

PROJECT REFEREE

Cameron Scott – Roads Infrastructure Director
Charters Towers Regional Council 07 4761 5300
Brian Shepherd – Principal Representative-Project
Delivery Managers – 0428 949 471

PROJECT TEAM

Project Manager: Peter Bell
Site Supervisor: Trevor Stevenson

PROJECT SYNOPSIS

- 54,000m² of full width insitu stabilisation with BaseBind

Project Overview

Milray Contracting were awarded the \$151,000 package from Charters Towers Regional Council as a trial for Council to evaluate BaseBind's potential for reducing ongoing maintenance costs on Council's extensive unsealed road network. The contract was awarded based on value for money and a proven track record of delivery of various other similar projects for Council.

The package involved the addition of BaseBind a specialist bitumen emulsion product developed by Fulton Hogan and Cooee Chemicals. The road was reshaped to the correct profile prior to the stabilisation and then the BaseBind was added to the pavement using Milray's stabiliser and then the pavement was compacted and trimmed in the normal manner. The project worked well and the road, which had previously required 3-4 maintenance grades per year has not been graded for 2 years.
