0409 589 698

Jim Sullivan – Principal Representative- Project
Delivery Managers – 0424 169 126

PROJECT TEAM

Project Manager: Peter Bell

Site Supervisor: Shaun Sheahan

PROJECT SYNOPSIS

- Replacement of existing 60yr old grid type bridge with a prefabricated HumeDeck Modular Bridge over Reedybrook Creek approximately 450km north of Charters Towers for Towers Regional Council area
- Construction of roadway approaches and relieving slabs

Project Overview

Milray Contracting has recently been awarded the \$211,000 package from the Charters Towers Regional Council as part of Councils ongoing replacement program for grid bridges that have reached the end of their service life.

The package involves the removal of the existing grid bridge structure and replacing it with a single span HumesDeck Modular Bridge. Work involves excavation and construction of concrete abutment bases and construction of bridge relieving slabs and bridge approach earthworks and pavement.

As this project will require a sidetrack only preliminary works have commenced at this stage to reduce flooding risks and subsequent delays to the residents and travelling public on the road which would involve a 250km detour. The bridge work will commence after the 2018 wet season.
