Project Overview

Milray Contracting were awarded the \$395,000.00 NDRRA package from the Charters Towers Regional Council as part of the Natural Disaster Relief and Recovery Arrangements (NDRRA). These are a joint funding initiative of the Commonwealth and State Governments to provide disaster relief and recovery payments and infrastructure restoration to help communities recover from the effects of natural disasters.

The contract was awarded based on the NDDRA project award guidelines based on value for money and a proven track record of delivery of projects of a similar nature and within the tight timeframe available.

This works package was one of several Milray Contracting were awarded from the Charters Towers Regional Council. A high level of relationship management was established due to high quality of workmanship and time management.

This package was completed under budget and ahead of practical completion.
