Site Supervisor: Paul McDonald

PROJECT SYNOPSIS

- 48,000m² of road reconstruction
- 9,000t Type 2.5 shape correction gravel
- 1,000t of Type 2.1 pavement
- 1,600m² of bitumen seal
- 120t DG10 asphalt

Project Overview

Milray Contracting were awarded the \$600,000 package from Townsville City Council to help reduce maintenance costs and to improve the road standard for residents living in a rural area on the north western side of Townsville. The contract was awarded based on value for money and a proven track record of delivering similar projects.

The package involved the addition of shape correction gravel, blending with the existing pavement, moisture conditioning, compaction and trimming ready for seal by others. The project also involves the complete reconstruction of 2 curves with excavation of the existing pavement, Type 2.1 pavement followed but sealing and asphalt.
